

## Goldster Choir recording process - August/September 2023

1. Emma will provide a special backing track to choir members for them to sing along too in the recording. This is now available to listen to on the Goldster Soundcloud page here - <https://soundcloud.com/user-204372506>
2. **You will need two devices and a pair of headphones to record yourselves.** Usually this would be a smartphone and a laptop or similar. Position the camera of one device facing you at eye level. This will record your singing. You should then plug in/ connect your headphones to the second device where you will play the backing track from.
3. Presses 'record' on the video and then press 'play' on the music backing track on your 2nd device.
4. Sing in time to the music and give it everything you've got! Then stop recording. Please remember to wait until the whole song is finished before stopping the recording - and remember you are on film so lot's of smiles and eye contact with the camera.
5. Now, depending on your device you can send me the final files. This process will differ from one device to the next. If you already know how to send a file then you can either send to me via wetransfer or by clicking this Dropbox link and dragging the file into the area in the centre of the screen - <https://www.dropbox.com/request/NqSERWkt5YqINMZmzrVs>. There is of course a multitude of ways you can send me the the file(s) and my email address and mobile number are listed below - feel free to contact me to ask advice on any thing at all.

If any or all of this seems too much then I am of course happy to meet on a Zoom call and we can do the recording there too - you will still

need two devices and headphones - but it might make things easier for you.

Any questions or help then I am at your service!

Ben :)
